## DETAILED ACTION

### *Allowable Subject Matter*

1. Claims 4-8,10-16,33-52,61 are allowable over the prior art of record.

The recited limitations of independent claims 4,11, and 16, pertaining to the combination of a double normalization process of banded noise signals in the time domain with a non-linear mapping function, is not explicitly taught by the prior art of record.

With respect to the prior art of record, it is old and notoriously well known in the art of audio signal processing to perform ambient noise compression for storage. For example, Rasmussen et al (5835851) teaches a method for compression of an electric audio signal (abstract) wherein noise is subject to a variable attenuator (col. 5 line 63 – col. 6 line 15) and mapping the noise back to an acceptable energy level to match the speech → col. 6 lines 15-25); Kang et al (4630300 teaches switching between a low pass filter and a power ratio computation (Fig. 2); Freifeld et al (4061875) teaches alternating between a compressor and an expander (Fig. 2); Williamson et al (5027410) teaches a multistep gain function (col. 11 line 45 – col .12 line 50) for noise suppression.

However, none of the prior art of record explicitly teaches the combination of a double normalization process of banded noise signals in the time domain with a non-linear mapping function, as recited in independent claims 4,11, and 16, as noted above. Furthermore, it would not have been obvious to one of ordinary skill in the art of audio

compression at the time the invention was made to modify the teachings of the prior art of record to obtain the recited claim limitations of independent claims 4,11, and 16, as noted above.

Dependent claims 5-8,11-15,33-52,61 are allowable over the prior art of record because these claims depend from claims that have been determined to be allowable over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
